

ATTACHMENT 2 CROP MONITORING RECORD TEMPLATE

This form should be filled out by approved crop monitors to certify that orchards have been found free from mango seed weevil, stem end rot, red-banded caterpillar and bacterial blackspot and have been monitored for pests of quarantine concern to Korea. Crop monitoring must occur at least once every 2 weeks from flowering until the completion of harvest.

Grower name																							
Export number																							
Orchard/block	Survey start date	Survey finish date	No. trees in orchard	No. trees sampled	No. fruit sampled (mango seed weevil systems approach only)	Detections of mango seed weevil, stem end rot, red-banded caterpillar or bacterial black spot		Detections of other pests of quarantine concern and responsive measures used															
						Y / N	Pest:	Y / N	Pest:	Y / N	Pest:	Y / N	Pest:	Y / N	Pest:	Response:							

On behalf of (name of grower), I declare that the details of orchard surveys on this form are a true and accurate summary of the survey records
